MAIN PROJECTS

Twitter Timeline (rtCamp Challenge)

Technology *- PHP , jQuery , Twitter API , Google API*

User can see their latest 10 tweets of twitter and see their followers list and their latest 10 tweets of twitter. User can export tweets data on Google Spreadsheet and download tweets data in CSV, EXCEL, PDF and JSON Format. User can also search any twitter user and download their tweets up to 3200.

MakersLog (TechTop 2017)

Technology *- Laravel , Vue.js , jQuery , Google API , GitHub API*

This portal is for participants of TechTop 2017. Portal has provided facilities such as participants can write their daily experiences as a blog with attachments like documents & project files & remote presentation upload / present facility with google drive. So not need Server Space for Storage Data. This project also includes a micro & lightweight day to day task management system.

What to Watch

Technology *- Laravel*

This is Movies & Series Data Portal made to characterize that data in different categories, genres etc. with different data access levels integrated.
